Soldering

Manual Of Soldering

The temperature of the iron tip should not be higher than 300℃and Soldering within 3 seconds per solder-land is to be observed.

Reflow soldering :(All temperatures refer to topside of package, measured on the package body surface.)

Caution:

1.Reflow soldering should not be done more than two times.The reflow temperature we recommend is 240℃(±5℃),the maxmum soldering temperature should be limited under 245℃.

2.Repairing should not be done after the LEDs have been soldered. When repairing is unavoidable, suitable tools have to be used.

3.When soldering, do not press on the LEDs during heating.

4.After soldering, do not warp the circuit board.

5.Do not add any stress on the component.

Precaution for use

1.Storage

To avoid the moisture penetration ,we recommend storing LEDs in a dry box (or a desiccators) with a desiccant. The recommended conditions are temperature 5~30 ℃, Humidity 60% maximum.

2.Aafter opening packing

2.1.Soldering should be done right after opening the package (within 24Hrs).

2.2.Keeping of a fraction.

-Sealing

-Temperature: 5~30℃ Humidity: less than 30%

2.3.If the package has been opened more than 1 week or the color of desiccant changed, components should be baked for 12 Hrs at 60±5℃.

3.Any mechanical force or any excess vibration shall not be accepted to apply during cooling process to normal temperature after soldering.

4.Please avoid rapid cooling after soldering.

5.Components should not be mounted on warped direction of PCB.

6.This device should not be used in any fluid such as water, oil ,organic solvent etc.

7.When the LEDs are illuminating, operating current should be decided after considering the package maximum temperature.

8.Avoid touching Lens parts especially by sharp tools such as pincette.

9.Please do not force impact or pressure diagonally on the silicone lens. It will cause fatal damage on this product.

10.Please do not cover the silicone resin of the LEDs with other resin.

11.Do not use metal suction nozzle, rubber or silica gel suction nozzle is recommended.
