

**DESCRIPTION: 3W 2.5KV Isolation Wide Input AC/DC Converters**

The rated output power of TP03AA series is 3W with wide input voltage range, for both AC input and DC input application. High reliability, precision, large power density, ultra-small size, no external heat sink required, stable output voltage and etc, with over current protection, EMI filter circuit, the rectifier filter circuit, 2500V isolation voltage, short circuit, overload, internal thermal protection, Widely used in telecommunications, industrial control, instrument, data acquisition, signal control and other electronic systems.

FEATURES

Universal input voltage range	Both for AC and DC input voltage	Wide input voltage:2:1 and 4:1
Fixed switching frequency	Overheat protection	Over current protection
Short circuit protection	RoHS compliant	Operating temperature : -25°C to 70°C

USING ATTENTIONS

- Module will cause irreversible damage when it is in the long-term overload state.
- Module will cause irreversible damage when it is out of the state maximum input voltage range
