

High Power Emitter LED
P/N: HL-C3535F5R1EA-ZW(Red)

ATTENTION
OBSERVE PRECAUTIONS
FOR HANDLING
ELECTROSTATIC
DISCHARGE
SENSITIVE
DEVICES

Features

- Dimension 3.45mm×3.45mm×1.9mm
- Long operating life
- High efficiency
- Lambertian radiation pattern
- Low voltage DC operated
- Cool beam, safe to the touch
- High heat dissipation efficiency
- Superior ESD protection
- RoHS compliant

Applications

Small size, Flexible design

...

Package Dimensions

Recommended Soldering

Notes:

1. All dimension units are millimeters.
2. All dimension tolerance is $\pm 0.2\text{mm}$ unless otherwise noted.

High Power Emitter LED

P/N: HL-C3535F5R1EA-ZW(Red)

Radiation Pattern

Device Selection Guide

Part No.	Chip		Lens Color
	Material	Emitting Color	
HL-C3535F26B443EA	—	Red	Water clear

Electrical / Optical Characteristics at TA=25°C

Symbol	Parameter	Device	Min.	Typ.	Max.	Units	Test Conditions
Φ_V	Luminous Flux	Red	—	17	—	lm	IF=350mA
Φ_e	Radiation Power		—	284	—	mW	IF=350mA
VF	Forward Voltage [1]		2.0	—	2.4	V	IF=350mA
λ_d	Wave Length		660	—	665	nm	IF=350mA
$2\theta_{1/2}$	50% power angle		—	130	—	deg	IF=350mA
IR	Reverse Current		—	—	30	uA	VR = 5V

Note:

- 1.For each die.
2. $2\theta_{1/2}$ is the angle from optical centerline where the luminous flux is 1/2 the optical centerline value.
- 3.The value only for reference.

Absolute Maximum Ratings at TA=25°C

Parameter	Symbol	Rating	Units
Power dissipation[1]	Pd	1	W
DC Forward Current[1]	IF	350	mA
Reverse Voltage[1]	VR	5	V
Operating Temperature Range	Topr	-20°C To +65°C	
Storage Temperature Range	Tstg	0C To +40°C	

Note:

- 1.1/10 Duty Cycle,0.1ms Pulse Width.
- 2.The temperature of Aluminum PCB do not exceed 55°C.

Soldering

Manual Of Soldering

The temperature of the iron tip should not be higher than 260°C (500°F) and Soldering within 3 seconds per solder-land is to be observed.

Reflow soldering : (All temperatures refer to topside of package, measured on the package body surface.)

Profile Feature	Lead-Based solder	Lead-Free Solder
Average Ramp-Rate (Tsmax to Tp)	3°C/second max	3°C/second max
Preheat: Temperature Min (Tsmin)	100°C	150°C
Preheat: Temperature Max (Tsmax)	150°C	200°C
Preheat: Time (tsmin to tsmax)	60-120 seconds	60-180 seconds
Time Maintained Above: Temperature (Tl)	183°C	217°C
Time Maintained Above: Time (tL)	60-150 seconds	60-150 seconds
Peak/Classification Temperature (Tp)	215°C	260°C
Time Within 5°C of Actual Peak Temperature (tp)	10-15 seconds	20-40 seconds
Ramp-Down Rate	6°C/second max	6°C/second max
Time 25°C to Peak Temperature	6 minutes max	8 minutes max

Caution:

1. Reflow soldering should not be done more than two times. The reflow temperature we recommend is 245°C (±5°C), the maximum soldering temperature should be limited 260°C.

2. Repairing should not be done after the LEDs have been soldered. When repairing is unavoidable, suitable tools have to be used.

3. When soldering, do not press on the LEDs during heating.

4. After soldering, do not warp the circuit board, do not stack PCBs containing HL-3535 LEDs so that anything rests on the LED lens.

Packing

High Power Emitter LED
P/N: HL-C3535F5R1EA-ZW(Red)

Precaution for use

1.Storage

To avoid the moisture penetration ,we recommend storing LEDs in a dry box (or a desiccator) with a desiccant. The recommended conditions are temperature 5 to 30 degrees Centigrade. Humidity 60% maximum.

2.Precaution after opening packing

2.1.Soldering should be done right after opening the package (within 24Hrs).

2.2.Keeping of a fraction.

-Sealing

-Temperature: 5~30°C Humidity: less than 30%

2.3.If the package has been opened than 1 week or the color of desiccant changed, components should be dried for 10-12 Hrs at 60±5°C.

3.Any mechanical force or any excess vibration shall not be accepted to apply during cooling process to normal temperature after soldering.

4.Please avoid rapid cooling after soldering.

5.Components should not be mounted on warped direction of PCB.

6.This device should not be used in any fluid such as water, oil ,organic solvent etc.

When washing is required, Isopropyl Alcohol should be used.

7.When the LEDs are illuminating, operating current should be decided after considering the package maximum temperature.

8.Avoid touching Lens parts especially by sharp tools such as pincette.

9.Please do not force over 1000g impact or pressure diagonally on the silicone lens. It will cause fatal damage on this product.

10.Please do not cover the silicone resin of the LEDs with other resin.

11.Do not use metal suction nozzle, rubber or silica gel suction nozzle is recommended.

13. Do not stack PCBs or assemblies containing the LEDs so that anything rests on the LED lens. Force applied to the LED lens may result in the lens being knocked off. PCBs or assemblies containing the LEDs should be stacked in a way to allow at least 2 cm clearance above the LED lens.

14. Do not use bubble wrap directly on top of the LEDs. Force from the bubble wrap can potentially damage the LED.
